How to care for your Radius Table

Clean with water or mild detergent, using a soft, damp cloth. Avoid abrasive pads and harsh chemicals, as they may damage the surface.

Always lift when moving—do not drag or push—to prevent damage to both furniture and flooring, particularly on hard, mineral-based surfaces like concrete.

The Radius Table is suitable for indoor and outdoor use, but to ensure greatest longevity, dry the piece off if it becomes wet from rain or snowfall and keep indoors over winter.

Minor wear marks are considered a normal result of general use over time and can be retouched with a repair lacquer available via office@mel.furniture.
